

A grassroots movement to get...

SEEDS TO TREES .ORG

...more trees planted worldwide.

This seedling was grown by a community member working to making the earth a better place through the planting of trees. Anyone can do this; individuals, social clubs, school classes, religious groups, businesses, etc. SeedsToTrees.Org provides step-by-step instructions covering seed collection, germination in buckets, and giving the seedlings away within one's community (for free). In an effort to appear more environmentally progressive, businesses/events/etc will gladly display your seedlings, just ask (we guide you there too). Whether you give 5 seedlings away at work, or 100 at a bustling market... Collectively, the impact can be huge! Become a seedling grower: seedstotrees.org.

Think Globally, Act Locally... Become a Seedling Grower: SeedsToTrees.Org

Trees contribute immensely to the wellbeing and feel of a community:

- Make communities feel more friendly and inviting.
- Raise property values.
- Clean the air and produce oxygen.
- Beautify business districts, increasing foot traffic and therefore profits.
- Reduce summer temperatures by shading pavement and expanses of lawn.
- Encourage outdoor activity, improving human health and increasing social interaction.

**Think Globally,
Act Locally**

**Become a seedling grower:
